Stock News Headlines

FIG. 2

**... : ... date & time and fully diluted EPS**

34 A

"The P/E ratio is currently in the <upper end> of its range, relative to the P/E over the last 52 weeks. This could be an indication that the P/E is <fully> valued, and that the stock could be susceptible to stagnant or falling prices.

34B

The forward P/E is <lower> than the current P/E, which may indicate anticipated earnings (EPS) <increases>, and a <favorable> outlook for this company.

34C

1. Look at this company's historical P/E ranges to see how they compare.
2. Compare the P/E against the P/E's of the other companies in its industry.
3. Companies with <increasing> earning momentum tend to have <higher> P/Es.

34D
